BE CONSISTENT WITH THE LAYOUT CODE

CHALLENGE

Layout organization.

EXPLANATION

Students with learning disorder often find planning very tricky. Being concentrated is also very challenging activity as they easily get distracted and fidgety. Setting clear rules in classroom creates a sense of routine and stability which can be beneficial for all students.

ADAPTATION

You can test different kinds of layouts to check what fits best your students needs but whatever code you choose after the test phase, it must be stable. Once the code is adopted by the child, it will stick to it.

Although you can multiply the type of exercises to train students to process different type of situation. It is important not to focus on one template of exercises but to switch them.
